

CONTROLLED THERAPEUTICS (SCOTLAND) LTD

Polymer Technician

The company is seeking to recruit a Polymer Technician. Reporting to the manager of the Polymer Group and working within a small team, the successful candidate will be responsible for the preparation and analysis of polyurethane polymers. The role will involve small scale batch manufacture, continuous processing and characterisation using techniques such as DSC, Shore hardness and tensile strength.

Candidates will be qualified ideally to HNC/HND level in Chemistry or Chemical Engineering and have experience of working in a laboratory or industrial environment in a hands on role. In addition the candidate should have good communication and team working skills.

The company operates a competitive benefits package including salary, pension scheme, private healthcare and a flexible working policy.

If you are interested in applying for this position please send your CV to Eleanor Campbell, Controlled Therapeutics (Scotland) Ltd, 1 Redwood Place, Peel Park Campus, East Kilbride G74 5PB. Applications can also be e-mailed to Eleanor.Campbell@ctscotland.com.
