

CONTROLLED THERAPEUTICS (SCOTLAND) LTD

Validation Engineer

The company is seeking to recruit a Validation Engineer to support all companywide validation activities. Reporting to the Head of Engineering and working within a small team, the position would include scheduling of activities, preparing protocols and reports to GMP requirements and liaising with contractors.

The ideal candidate would have experience in equipment, process validation including utility systems, and be qualified to degree level.

Working within a cleanroom environment and/or the pharmaceutical or medical device industry would be advantageous.

If you are interested in applying for this position please send your CV to Eleanor Campbell, Controlled Therapeutics (Scotland) Ltd, 1 Redwood Place, Peel Park Campus, East Kilbride G74 5PB. Applications can also be e-mailed to Eleanor.Campbell@ctscotland.com.
